Summary of qualifications

Aleksander Glodek has a strong SAP consulting background and is oriented in manufacturing implementations and rollout projects. He was involved in SAP projects since 2004 with an SAP certificate in manufacturing (2005), playing a role as a consultant and later as project manager.

He has a wide business knowledge in SAP logistic components such as: Production Planning and Execution (PP), Materials Management (MM) and Quality Management (QM). Technical higher education oriented on management and ERP systems is an additional advantage. Since 2016 he was also a trainer for SAP Training Center in Warsaw.

Aleksander is custom with SAP implementation, rollout and upgrade techniques including conversion of R/3 to S/4 HANA. He has an expert level in master data migration using SAP tools or other legacy software.

His industry experience in SAP projects includes Automotive, Chemical industry, Electronics, Food and beverages (FMCG), Mining & smelting, Rail industry, Rubber industry, Oil & Gas (IS-OIL), Telecom & Broadcast, Consumer products and Furniture.

In the past Aleksander was working as a web designer and programmer since 1996. He first became a project leader in year 1999 and managed development of dedicated WWW systems. During this period, he had gained practical experience in object analysis, database architecture, programming, and master data integration.
